The schematic diagram illustrates the connection between the SIM2 module and the SIM7003 module. The SIM2 module is represented by a box containing a resistor labeled R0210. The connections are as follows:

- VREG_1.25A is connected to pin 1 (VCC) of the SIM7003 module.
- VREG_1PB_3P0 is connected to pin 2 (VCC) of the SIM7003 module.
- R0210 is connected to pin 42 (RST) of the SIM7003 module.
- SIM2_RST is connected to pin 82 (RST) of the SIM7003 module.
- SIM2_CLK is connected to pin 83 (CLK) of the SIM7003 module.
- SIM2_DATA is connected to pin 83 (CLK) of the SIM7003 module.
- GND is connected to pin 15 (GND) of the SIM7003 module.
