

飞线点位示意图

Schematic Diagram of Flyline Points

(For 6-14ProMax)

需要飞四条线，一端在主板对应的焊点上，一端在码片编程器对应的焊点上。

It requires four lines, one end on the solder joint corresponding to the motherboard and the other end on the solder joint corresponding to the chip programmer.
(焊点分别为1V8、SDA、SCL、GND)
The solder joints are
