The schematic shows the RF front end circuitry. It includes two antenna matching networks at the top left, labeled "50R_MHB_TRX1_ANT1" and "MMPA2_MHB_ANT_50R". These are connected to the RF inputs of the RFIC (RF01 and RF02). The RFIC is a central component with pins for VDD, GND, and various control signals. It is connected to two output stages, "50R_LTE_MHB_CROSS2_50R" and "50R_LTE_MHB_CROSS_1", which are part of the LTE MHB cross components. The circuit also includes several passive components like capacitors (C7042, C7046, C7048) and inductors (L7040, L7042, L7044, L7046, L7048) for impedance matching and filtering.
