UME500

The diagram is a complex wiring schematic for the UCP301 unit. It consists of a large grid of components, each represented by a small box containing a label. The labels are organized into columns and rows, with some components having multiple labels. The components are interconnected by lines, representing the wiring connections. The diagram is divided into several sections, with some components highlighted in different colors (yellow, blue, green, red) to indicate specific functions or groups. The overall layout is dense and detailed, providing a comprehensive view of the internal wiring of the UCP301 unit.
