[illegible]

The diagram shows a 555 timer (U508A) configured as an astable multivibrator. The timing network consists of a 100nF capacitor (C1000) and a 100kV resistor (R1000) connected to pins 6 and 7. Pin 8 is connected to VCC (10V). The output of the timer (pin 5) is connected to a 10kV resistor (R1000) and a 100nF capacitor (C1000). The output signal is labeled YBU508D.
