The schematic diagram illustrates the NFC module circuit. The U3001 NFC controller is connected to VBAT and VDD. The VDD supply is derived from VDD_SIM_1P8_3P0 and VDD_NFC_PVDD_1P8. The U3001 is connected to various control signals: NFC_FIRM, NFC_IRQ, NFC_CLK_REQ, and NFC_SWP. The internal NFC circuitry includes NFC_INTERNAL_1P8, NFC_SCL_1P8, and NFC_SDA_1P8. The U3001 is also connected to the ANT3001 antenna and the U3000 IC. The diagram shows the connection of the U3001 to the VBAT and VDD supplies, and the connection of the U3001 to the NFC_INTERNAL_1P8, NFC_SCL_1P8, and NFC_SDA_1P8 signals. The U3001 is also connected to the ANT3001 antenna and the U3000 IC.
