The diagram illustrates a power distribution system. On the left, two busbars are shown: 'D0401' (top) and 'D0402' (bottom). Each busbar has a '1' in a blue box and a '2' in a red box. Below each busbar is a label 'B-1871/2013'. A red line connects the '2' of D0401 to a central switchgear. Another red line connects the '2' of D0402 to the same central switchgear. The central switchgear has two main sections. The top section is labeled 'CH02 2.0M 11' and 'R45020V ±110V'. The bottom section is labeled 'CH03 2.0M 11' and 'R45020V ±110V'. Both sections have a '1' in a blue box and a '2' in a red box. To the right of the switchgear, there are two more busbars labeled 'D0402' (top) and 'D0401' (bottom). Each has a '1' in a blue box and a '2' in a red box. Below each is a label 'B-1871/2013'. A red line connects the '2' of the top D0402 to a busbar labeled 'WL_TP_DEMO'. Another red line connects the '2' of the bottom D0401 to a busbar labeled 'WL_TP1'. A third red line connects the '2' of the bottom D0402 to a busbar labeled 'WL_TP2'. The entire system is enclosed in a large blue oval.
