I. Precautions for Fault Entry

1. Distinguish between signal fault and WIFI fault

Signal fault refers to eliminating the reasons of mobile network itself and SIM card, and the problems such as no signal and weak signal in mobile network appear in mobile phones. Bluetooth fault, WIFI fault and GPS fault are separately established fault codes. WIFI and GPS signal problems are not signal faults, so WIFI fault or GPS fault should be entered according to the actual situation.

一级故障	二级故障	三级故障	故障描述&注意事项
功能故障	信号故障	无2G信号	排除移动网络本身原因和SIM卡原因。手机没有2G信号。
		无3G/4G信号	排除移动网络本身原因和SIM卡原因。手机没有3G或4G信号。
		信号弱	排除移动网络本身原因和SIM卡原因。手机2G/3G/4G信号弱。相同环境下同型号无故障手机信号正常。
	蓝牙故障	蓝牙打开故障	手机本身蓝牙无法打开属于此项故障现象
		蓝牙连接故障	手机无法搜索和连接到其他蓝牙设备均属于此项故障现象
	WIFI故障	WIFI开启故障	由于手机本身原因造成WIFI无法开启属于此项故障现象
		WIFI连接故障	由于手机本身原因造成WIFI连接故障属于此项故障现象
		WIFI传输故障	由于手机本身原因造成WIFI传输故障属于此项故障现象
		手机热点故障	手机热点相关的所有故障。包括手机热点无法打开。手机热点无法连接等
	GPS故障	定位慢	在相同环境下。同机型对比。GPS可以定位。但是定位时间长
		无法定位	在相同环境下。同机型对比。GPS无法定位
		定位不准	在相同环境下。同机型对比。GPS可以定位。但是定位不准确

2. Apply fault classification

After application failure update, it can be divided into two categories: A. Third-party application failure B. System application failure.

一级故障	二级故障	三级故障	故障描述&注意事项
应用故障	应用故障	第三方应用故障	非手机自带应用导致的故障
		系统应用故障	手机自带应用及MIUI本身导致的故障

Second, maintenance guidance

1. Display fault

1.1 Screen flashing/automatic screen locking/automatic screen lighting *

1.2 Poor appearance of display screen

2. Receiver failure

2.1 off-call/call-call earphone murmur

3. Speaker failure

3.1 Non-talking state/talking state speaker is silent

4. Turn on and off problems

4.1 Do not boot

确认故障现象

故障现象为：不开机

维修思路

维修方法：

- ① 拆机检查电池FPC 是否有扣好或者电池FPC有没有问题，如有，更换电池并且更换FPC对应下面的屏蔽罩

其他问题
分析解决

- ② 最新软件版本，排除故障。
- ③ 更换主板
